

Roadmap 2026

An execution layer for builders, with a clear path from working product to token to scale.

Voice-first

Open-source

Multi-agent

Utility token

INSIDE THIS ROADMAP

- The full 9-phase journey on one timeline
- A clear goal for what success looks like at every phase
- How the community and builders grow with the product
- Detailed tokenomics & presale terms shared this phase

Proof, then token, then scale

• In progress

• Next up

• Planned

PHASE 1 · PROOF Q2-Q3 2026

Foundation

Open-source core, voice → plan → execute agent demo

• In progress

1

PHASE 3 · PRODUCT Q3 2026

Desktop App

Native app, clean onboarding, full agent workspace

• Planned

2

3

PHASE 5 · LAUNCH Q3 2026

Public Token Launch

TGE, liquidity, governance & ecosystem utility

• Planned

4

5

PHASE 7 · SCALE Q4 2026

Cloud Sync & Team Workspaces

Encrypted sync, shared workspaces, role-based teams

• Planned

6

7

PHASE 9 · ECOSYSTEM Q2 2027

Builder Ecosystem

Templates, plugins & community-built agents to share

• Future

8

9

PHASE 2 · FUND Q3 2026

Token Foundation & Tokenomics

Design, vesting, audits & AMF / MiCA prep (France)

• Next milestone

PHASE 4 · FUND Q3 2026

Token Presale

Opens after the AMF notice period clears (~20 days)

• Investor round

PHASE 6 · PRODUCT Q4 2026

Mobile Companion App

Start & approve agent tasks from anywhere

• Planned

PHASE 8 · SCALE Q1 2027

Memory & Public GTM

Personalization, Product Hunt & ecosystem partnerships

• Planned

• EARN THE RIGHT TO RAISE

A real product, then a fundable token

01

PHASE 1 · PROOF

Foundation

● In progress

- Open-source desktop agent (live)
- Lead agent + sub-agent orchestration
- Early Discord community growth
- Voice flow: speak → plan → approve → execute
- GitHub, browser, file & terminal integrations
- The traction story investors will underwrite

GOAL 2,500 Discord members · 1,000 X followers

TIMELINE Q2-Q3 2026

02

PHASE 2 · FUND

Token Foundation & Tokenomics

● Next milestone

- Token design, supply & allocation model
- Audited smart contracts
- Allow ~20-day AMF notice period before offer
- Vesting & lockup schedule
- AMF / MiCA white paper & PSAN path (France)
- Compliance must clear before the presale opens

GOAL Tokenomics published & contracts **audited**, AMF filing accepted

TIMELINE Q3 2026

- SHIP THE APP, OPEN THE RAISE

Desktop app, then the presale

03

PHASE 3 · PRODUCT

Desktop App

- Planned

- Native desktop app experience
- Voice flow: speak → plan → approve → execute
- GitHub, browser, file & terminal integrations
- Cleaner onboarding for non-technical users
- Agent activity dashboard + local workspace
- The flagship product investors back

GOAL Public beta shipped · **500 active testers** · core features complete

TIMELINE Q3 2026

04

PHASE 4 · FUND

Token Presale

- Investor round

- Strategic / private allocation round
- KYC / AMF-compliant participation (France)
- Capital funds the public launch & utility
- Vesting & lockups to align early backers
- Opens only after the ~20-day AMF notice period
- This is the round we're raising now

GOAL **\$500K target raise** closed · backers onboarded & aligned

TIMELINE Q3 2026

- GO PUBLIC, GO EVERYWHERE

Public token launch, then mobile

05

PHASE 5 · LAUNCH

Public Token Launch

- Planned

- Token Generation Event (TGE)
- DEX / exchange liquidity
- Community & contributor allocation unlocks
- Governance participation goes live
- Treasury funds ecosystem grants & bounties
- Presale backers reach a value path

GOAL Token live with **healthy liquidity** & active governance voting

TIMELINE Q3 2026

06

PHASE 6 · PRODUCT

Mobile Companion App

- Planned

- iOS and Android companion app
- Start & approve tasks from mobile
- Receive task progress updates
- Voice notes → agent tasks
- Push notifications when work is done
- Possible hires: ambassadors, content, beta leads

GOAL Apps live on iOS & Android · **40% of users active on mobile**

TIMELINE Q4 2026

• SCALE

Teams, memory & the public push

07

PHASE 7 · SCALE

Cloud Sync & Team Workspaces

• Planned

- Optional encrypted cloud sync
- Multi-user agent projects
- Project history and audit logs
- Shared team workspaces
- Role-based permissions
- Opens a paid / team revenue tier

GOAL 50 teams using shared workspaces · first paying customers

TIMELINE Q4 2026

08

PHASE 8 · SCALE

Memory & Public GTM

• Planned

- Long-term user, project & team memory
- Smarter recurring task automation
- Partnerships with AI & devtool communities
- Adaptive behavior from usage patterns
- Product Hunt & GitHub growth campaign
- Make OpenYabby impossible to ignore

GOAL 25,000 monthly active users · strong retention & word-of-mouth growth

TIMELINE Q1 2027

A platform builders build on

09

PHASE 9 · ECOSYSTEM

Builder Ecosystem

• Future

Once the core product is solid, OpenYabby opens up so anyone can extend it and share their work — turning the product into a self-growing ecosystem.

- Ready-made templates & workflows
- Community-built agents to share
- Recognition & rewards for builders
- Plugins & third-party integrations
- A place to publish & discover them
- A growth engine for the whole ecosystem

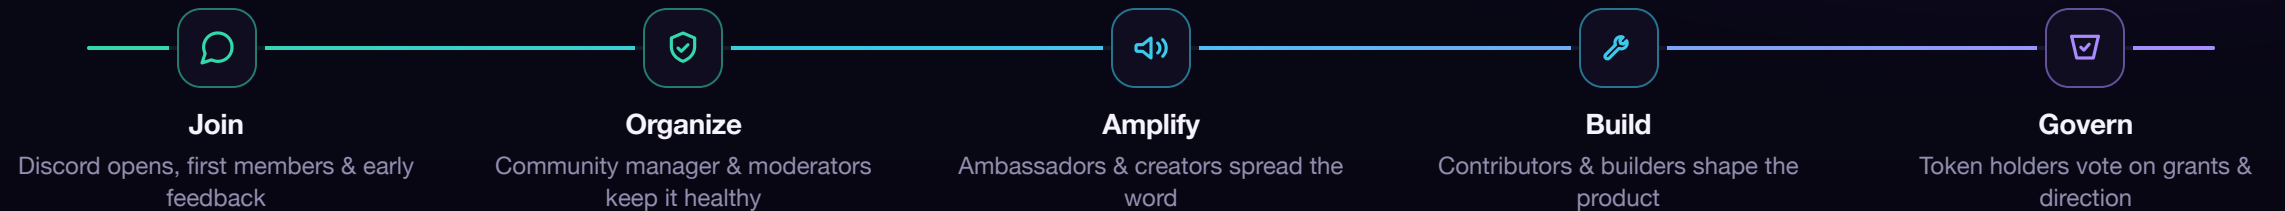

GOAL 100+ community-built agents & templates published

TIMELINE Q2 2027

• GROWS ALONGSIDE THE PRODUCT

Built with the community

The product is only half the story. OpenYabby grows through the people who use it, support it, and build on top of it.

How people get involved

Clear ways to take part, with paid roles opening as we grow.

- Discord community members
- Ambassadors & regional hosts
- Open-source contributors
- Community manager & moderators
- Content creators & tutorial makers
- Beta testers & early adopters

Why it matters GROWTH ENGINE

Community is not a side project. It is how an open-source product spreads, improves, and lasts.

- Faster feedback & better product
- Contributors extend what we build
- Rewards & grants for real impact
- Organic, word-of-mouth growth
- Shared ownership through governance
- Leads into the Builder Ecosystem (Phase 9)

GOAL An active, self-sustaining community that **grows itself**

From ideas to execution

OpenYabby is not just another AI chat tool. It is an execution layer for builders.

- 01 **Speak an idea.**
- 02 **Approve the plan.**
- 03 **Let agents bring it to life.**

Voice-first

Open-source

Multi-agent

Built for execution

CORE MESSAGE

The biggest opportunity in AI is not generating better responses. It's building systems that complete meaningful work.
